

“Pilgrim Gen Z Skincare Discovery: Enhancing Product Engagement Through AI & UGC”

1. Problem Understanding:

First-time User Challenges:

Gen Z consumers face four critical hurdles when discovering skincare online:

- **Choice Paralysis:** Almost 80% feel overwhelmed by product choices. New users struggle to navigate Pilgrim’s catalog without guidance. In user research conducted, the respondents cited “too many options” as their top frustration when shopping online.
- **Trust Gaps:** Almost 65% of the users mentions the distrust in product recommendations without a proper validation.
- **Uncertainty about Fit:** Because users are unable to visualize any results or verify suitability, most of the time, they abandon carts.

Business Impact:

- **High bounce rate** (~60% from homepage) indicates poor discovery experiences.
- **Conversion Rates: Low conversion rates** (<2%) suggest users struggle to find relevant products.
- **Missed retention opportunities** erode margins.
- **Lost Conversions:** Visitors who browse more than 3 product pages without guidance convert **less than 25%**.
- **Shallow Engagement:** Average session duration stalls at **1.2 minutes** which is too short to build trust or cross-sell.
- **Missed Retention:** **70%** of Gen Z won’t rebuy if the first purchase fails, hurting LTV.

ROOT CAUSE: Pilgrim’s static, one-size-fits-all discovery experience ignores Gen Z’s demand for **personalization, interactivity, and social proof**.

2. User Segmentation:

User Persona	Needs	Motivation	Shopping Behaviour
Hina Ansari (21)	● Simple	● Wants to	● Abandons

• College Student • Uses products but wants to level up • Doesn't know where to start	• Routines • Education without jargon	• establish basic skincare habits • Risk-free purchases	• carts after reading negative reviews • Prefer beginner kits over products
Kshitiz Jaiswal (25) • Always hunting viral products • Loves experimenting but wary of hype • “<i>Is the product actually good?</i>”	• Proof of efficacy • Dupe alerts for high-end products • Limited edition collabs	• Wants to stay current with beauty trends • Values authenticity over polish	• Search for dupe alerts and budget alternatives • Scrolls to read 3 or more stars reviews
Surbhi Sinha (27) The conscious experimenter	• Clean ingredient transparency • Ethical sourcing details	• Aligns purchases with personal values • Willing to stay premium for sustainability	• Cross check ingredients on INCIDecoder • Prefers refillable packaging

3. Solution Proposal: “*Pilgrim SkinGenie*”

Instagram reels-style feed where users discover products through peer videos and instantly test them via AR.

Core Features:

➤ **30-second “Skin Snapshot Quiz”**

- 3 visual questions -> generates a “*skin ID*” (eg- “Sensitive Glow Seeker”)
 - Snap a selfie in natural light. This will help AI analyze skin texture/concerns)
 - Pick your top goal. This may include acne control, anti-ageing or something else

- Describe your ideal routine (Like quick or traditional skincare routine)
- **Scrollable SkinTok Feed**
 - Short-form videos from real users (not from influencers) which will show:
 - Before/after results
 - Routine hacks
 - **AI Powered Matching:** Tags videos by skin type/concern (example: #DrySkinSolutions)
- **1-Click Try-On**
 - Tap any product in a video -> activate AR camera to:
 - Stimulate text (eg - serum glow on user's skin).
 - Project results ("Your hyperpigmentation in 4 weeks" slider).
- **"Copy This Routine" Kits**
 - Bundles products from videos with one tap
- **Reaction Badges**
 - Rate videos with skin emojis
 -  **#GlowUp** = "Worked amazingly!"
 -  **#WorthTheHype** = "Surpassed expectations"
 -  **#CleanFeels** = "Loved the texture/scent"
 -  **#ScienceWin** = "Felt the actives working"
 -  **#StingAlert** = "Tingled/burned (not in a good way)"
- **Wireframe Flow:** [Prototype](#)

4. Key Performance Metrics:

KPI	Target	Tool
Quiz Completion Rate	>=65%	Mixpanel
AR Try-On conversion lift	2.5x	Shopify Analytics
SKIN ID Adoption Rate	>=65%	Google Analytics
"Copy Routine" CTR	15%	Hotjar
UGC submissions week	70+	Moderation Dashboard

Improvement Tracking:

- Compare 7-day retention rates between users who completed vs skipped the quiz

5. Data Thinking:

→ Pre-Launch Data Needs:

- ◆ Quantitative: Current add-to-cart rates by product category.
- ◆ Qualitative: User testing transcripts on pain points with current discovery.

→ A/B Test:

- ◆ Control: Existing product grid.
- ◆ Variant: Home-page with “Scan your Skin” CTA
- ◆ Primary Metric: Time-to-first-interaction.
